THE FARMER AIR SHIP. Successful Exhibition Given at Evansville Ball Park.

Evansville Journal. The Farmer air ship made its first public trip at the baseball park yesterday. The promoters had wished for, and it was quite a novel sight to see the ship soaring in the air like a great bird, going up and down, backward and forward at the will of the operator. The main part of the ship is the balloon, which is in the shape of a big cigar. Suspended is a tricycle affair, to which are fastened large paddles which propel the "wind" in any direction by means of a series of cogs connected with the crank of the bicycle. The invention is in but a crude form, and the owners expect to have a finer and larger ship built in the course of several months, and the experiment yester-day proved that the air ship will possibly e one of the great inventions of the

It is with a desire to do what is for the best interests of the city schools that Superintendent Weaver has taken the step indicated in his statement.
